ABOUT US

Integra Team was established in 2015 in order to provide highest technological solutions and services in the field of Security and Networking sector for privately owned or governmental leading institutions in Saudi Arabia.

Integra Team service concept depends on Unconditional Customer Satisfaction. Together with its professional staff operating in Khobar headquarters and most cities of Saudi Arabia, Integra Team is in full control of all of its installed systems located allover Saudi Arabia, trusting its technical staff that consists of highly expertised and Trained engineers and technicians in advanced security technologies and Networking systems.

Integra Team has been the leading consultant and installer since the begining of activities in the field of Security and Networking systems in relevance with project design and implementation services; and it provides solutions through applying the latest technological events.

VISION

Our professional technical service team is just behind your door, delivering innovative solutions right when and where you need them across the Kingdom.

Mission

At our core, we are committed to providing dependable and cutting-edge technical solutions in a timely and efficient manner. Our team of professionals is dedicated to building strong relationships with our clients throughout the Kingdom, ensuring that we are always accessible and responsive to their needs. By fostering a deep understanding of our clients' objectives, we strive to empower their success and facilitate the achievement of their goals. Our ultimate goal is to strengthen our partnerships and drive mutual growth and prosperity.

ACCESS CONTROL AND TIME ATTENDANCE

Integra Team provides Access Control Systems, which constitute an integral part of electronic security systems, with a wide range of products according to the operating scenarios provided by the customer and the risk analysis carried out by our engineers for the fulfillment of multiple purposes. These are put into operation and delivered as a turnkey optimum equipment configuration.

Integra Team has included biometric systems in its Access Control configurations. This provides solutions and makes it possible for the system to be integrated according to the scenarios provided by the customer. The systems are therefore installed based on the risk analysis carried out by our company to provide turnkey solutions with an optimum equipment configuration. Biometric devices used as stand-alone or integrated systems are designed by making use of the measurable unique physical human characteristics for identity verifications.

SURVEILLANCE CAMERAS

Integra Team designs Surveillance Systems, which have become an indispensable part of electronic security and automation systems over the last 10 years.

Our company designs integrated systems for projects considering all the requirements visualized by the customer. Large and small projects are designed by considering the operating scenarios provided by the customer and the risk analysis carried out by the engineers of our company to provide optimum equipment configuration.

Surveillance Systems installed for security purposes are normally used to manage the movement of people around the areas to be protected. The videos captured by these cameras are stored either digitally or conventionally. The stored videos can be accessed from remote locations.

PUBLIC ADDRESS SYSTEMS (Audio Video System)

A public address or PA system is a combination of a set of audio equipment that allows broadcasts over a designated area. Often found in schools, office buildings, Malls. PA systems can be used for announcements or emergency information and provide a simple way to get information out quickly.

PA systems can be basic or advanced and can be adapted to fit a variety of needs.

MAINTENANCE CONTRACTS

In any installation that we need to protect, we can never forget the importance of carrying out security system maintenance. The maintenance of the security system involves periodic checks of all the elements that make up the installation (cameras, detectors, access control, gates, network infrastructure, etc.) to verify that they work well.

This would be preventive maintenance. Next, systems that are not functioning properly would be corrected or repaired (corrective maintenance).

IT INFRASTRUCTURES

Integra Team has made it among the leading project companies of our country regarding network with the important projects it completed with its expert staff on LAN, WAN, and complex networks.

Integra Team's service understanding is based on ensuring the continuance of data flow by means of designing complete solutions based on customer requirements, developing efficient solution mechanisms against possible problems, and showing zero-tolerance against any problems that may occur in the data flow. Accordingly, at the beginning of every project, Integra Team's engineers having network setup expertise carry out detailed investigation operations, determine exactly the requests and requirements of the customer, meticulously monitor the implementation of the project and deliver key in hand the network setup by taking into consideration the most current world standards.

Integra Team's main objectives in its project implementations besides the maximum customer satisfaction is to provide continuous and efficient data management.

SECURITY SYSTEMS

Integra Team installs reliable and advanced wired/wireless and conventional technologies for the security of homes and offices, integrating them, upon request, with electronic detection and automation systems that are compatible with the solution.

Integra Team designs various projects intended to satisfy all sorts of requirements and to be compatible with all sorts of solutions of different scales and designs depending on the operating scenario provided by the customer and the risk analysis carried out by our engineers and makes turnkey deliveries with an optimum equipment configuration.

TELEPHONY SYSTEMS

With many years of professional experience in Voice and IP Telephony, we cooperate with our clients and listen to their requirements, we insist on “maximize the value for voice over IP communication”, Integra Team provides competitive VoIP total solution for customers and continues to enhance their user experience and create more value for them.
